

### **PRE-HEALTH RELATED STUDY IN OTHER FIELDS**

USAO furnishes academic courses for those who will apply to enter clinical or post-graduate work in:

- Optometry (Doctor of Optometry)
- Physical Therapy
- Radiologic Technology (which includes Nuclear Medicine, Radiography, Radioactive Radiation Therapy, Sonography)
- Others

In general, all programs involving clinical work require selective admission before the clinical phase of the education. A good academic record as well as an exact program of courses will be needed. All pre-health related students should first contact the chair of the science department, who will secure an informed advisor for them. Students interested in health-related professions other than those specifically mentioned above may find that a part or all of their pre-professional work can be done at USAO. All such people are invited to contact the chair of the science department for information.
